## Libraries

```
library(lubridate)
```

```
##  
## Attaching package: 'lubridate'  
## The following object is masked from 'package:base':  
##  
##     date
```

## Data

### Read Data In

The data is a CSV file that is created by saving the ACR tab of the FPA Excel Workbook.

```
ACR.raw <- read.csv(file = "../data/ACR.csv",
                    stringsAsFactors = FALSE)
name <- c("SQA",
          "Application",
          "CRNumber",
          "CRDate",
          "CRApproved",
          "IENumber",
          "IEDate",
          "IEApproved",
          "Reason",
          "Comments")
names(ACR.raw) <- name
rm(name)
ACR <- ACR.raw
```

## Format the Data

### Convert to Factor

```
ACR$SQA <- as.factor(ACR$SQA)
ACR$Application <- as.factor(ACR$Application)
ACR$CRApproved <- as.factor(ACR$CRApproved)
ACR$IEApproved <- as.factor(ACR$IEApproved)
levels(ACR$IEApproved)[1] <- NA
ACR$Reason <- as.factor(ACR$Reason)
levels(ACR$Reason)[1] <- NA
```

### Convert to Dates

```
ACR$CRDate <- as.Date(ACR$CRDate, format = "%d-%b-%y")
ACR$IEDate <- as.Date(ACR$IEDate, format = "%d-%b-%y")
ACR$CRmonth <- lubridate::month(ACR$CRDate, label = TRUE)
ACR$CRyear <- lubridate::year(ACR$CRDate)
ACR$IEmonth <- lubridate::month(ACR$IEDate, label = TRUE)
ACR$IEyear <- lubridate::year(ACR$IEDate)
```

## Structure of The Data

```
str(ACR)
```

```
## 'data.frame': 421 obs. of 14 variables:
## $ SQA : Factor w/ 6 levels "Beilah","Liz",...: 3 3 3 6 6 2 2 3 3 6 ...
## $ Application: Factor w/ 21 levels "", "ADDCOM", "AFMS",...: 6 6 6 10 10 10 10 6 3 10 ...
## $ CRNumber : chr "CSIT0824" "CSIT07991" "CSIT08209" "17-23207" ...
## $ CRDate : Date, format: "2016-08-15" "2016-11-30" ...
## $ CRApproved : Factor w/ 4 levels "", "A", "A-FP",...: 2 2 2 3 3 3 3 2 2 3 ...
## $ IENumber : chr "CSIT0824" "CSIT07991" "CSIT08209" "17-29297" ...
## $ IEDate : Date, format: "2018-10-08" "2018-10-08" ...
## $ IEApproved : Factor w/ 3 levels "A", "A-FP", "D": 1 1 1 2 2 2 2 1 2 2 ...
## $ Reason : Factor w/ 7 levels "Inaccurate information",...: NA NA NA NA NA NA NA NA NA ...
## $ Comments : chr "" "Cancellation" "" "I&E by Nick" ...
## $ CRmonth : Ord.factor w/ 12 levels "Jan"<"Feb"<"Mar"<...: 8 11 3 8 8 8 8 10 12 4 ...
```

```
## $ CYear      : num  2016 2016 2017 2017 2017 ...
## $ IEmonth     : Ord.factor w/ 12 levels "Jan"<"Feb"<"Mar"<...: 10 10 10 1 1 1 1 10 1 1 ...
## $ IYear       : num  2018 2018 2018 2019 2019 ...
```

## Metrics

### Select Data

Data is selected first for the Month and Year of interest. The selection is based on both the CR and I&E dates. This selection is used as a master dataframe. Two additional dataframes are produced the first of the approval of the CR in the month and the second for the approval of the I&E in the month.

```
#create master dataframe
work <- subset(ACR,
               subset = (CRmonth == "Mar" & CYear == 2019) |
               (subset = IEmonth == "Mar" & IYear == 2019))
# Create the CR data frame
workCR <- subset(ACR,
                 subset = CRmonth == "Mar" & CYear == 2019)
# create the IE data frame.
workIE <- subset(ACR,
                 subset = IEmonth == "Mar" & IYear == 2019)
```

### Counts

#### Data Changes (CR) Request Approved

```
nrow(subset(workCR,
             subset = (CRAproved == "A" | CRAproved == "A-FP")))
```

```
## [1] 48
```

#### Data Change Request Disapproved

```
nrow(subset(workCR,
             subset = (CRAproved == "D")))
```

```
## [1] 3
```

#### Implementation and Effectivity (IE) Approved

```
nrow(subset(workIE,
             subset = (IEAproved == "A" | IEAproved == "A-FP")))
```

```
## [1] 57
```

#### IE Disapproved

```
nrow(subset(workIE,
             subset = (CRAproved == "D")))
```

```
## [1] 0
```

## First pass acceptance

### CR

```
nrow(subset(workCR,  
            subset = CRApproved == "A-FP")) /  
    nrow(workCR) * 100
```

```
## [1] 92.15686
```

### IE

```
nrow(subset(workIE,  
            subset = IEApproved == "A-FP")) /  
    nrow(workIE) * 100
```

```
## [1] 93.33333
```

### Total Process

This is the number of data changes that had both the CR and IE approved on first pass.

```
nrow(subset(work,  
            subset = (CRApproved == "A-FP" & IEApproved == "A-FP"))) /  
    nrow(work) * 100
```

```
## [1] 49.48454
```

## Number by Application

### Opened

```
table(subset(workCR,  
            subset = CRApproved != "D")$Application)
```

```
